

GLOBAL 2000

PESTIZID REDUKTIONS PROGRAMM

Obergrenzenliste

REWE 
GROUP

März 2025

Die PRP-Obergrenzenliste wird anhand einer Exportdatei von der EU-Pesticides Database erstellt. Somit basieren die Angaben in dieser Liste auf den zu einem bestimmten Zeitpunkt (Datum des Downloads: 19/12/2024) vorliegenden Daten, die nicht immer die aktuell gültigen sind. Es gelten aber immer die aktuell veröffentlichten ADI und ARfD-Werte der EFSA zu den jeweiligen Wirkstoffen. Wir verfolgen die Aktualisierungen der EU Database und passen regelmäßig die Obergrenzen-Liste an die veröffentlichten Änderungen an.

<https://ec.europa.eu/food/plant/pesticides/eu-pesticides-database/active-substances>

I. LEGENDE:

-  Substanzen, die als EDC (Endocrine Disrupting Chemicals) identifiziert wurden und deren PRP-Obergrenzen seit 1. Oktober 2016 halbiert wurden
-  Als Top 25 (Top 10 + 15 Neu) klassifizierte EDC-Wirkstoffe im PRP (siehe Handbuch)
-  PRP-Obergrenzen, die aufgrund der neuen, niedrigeren ADI-Werte gesenkt wurden. (Gültig ab 01.03.2025)
-  PRP-Obergrenzen, die aufgrund der neuen, höheren ADI-Werte angehoben wurden (gelten ab sofort)

II. PROZEDERE:

ARfD Überschreitung bei Produkten mit nicht essbaren Schalen (klein und groß, laut Teil A des Anhangs I der EU Verordnung 396/2005):

Bei einer unmittelbaren Überschreitung der ARfD eines bestimmten Wirkstoffes wird der essbare Anteil der Frucht analysiert. ARfD Berechnungsmodell ist PRIMo 3.1 (Pesticide Residue Intake Model) von EFSA: <https://www.efsa.europa.eu/de/applications/pesticides/tools>

Die EU-Höchstwertverordnung gilt immer.

PRP-Obergrenzen: $PRP-OG = [13,5\text{kg (4-6 altes Kind)} \times ADI] / 1\text{kg}$ (frisches Obst oder Gemüse/Tag). Es gilt eine Analysetoleranz bis 200% für die PRP-Obergrenze.

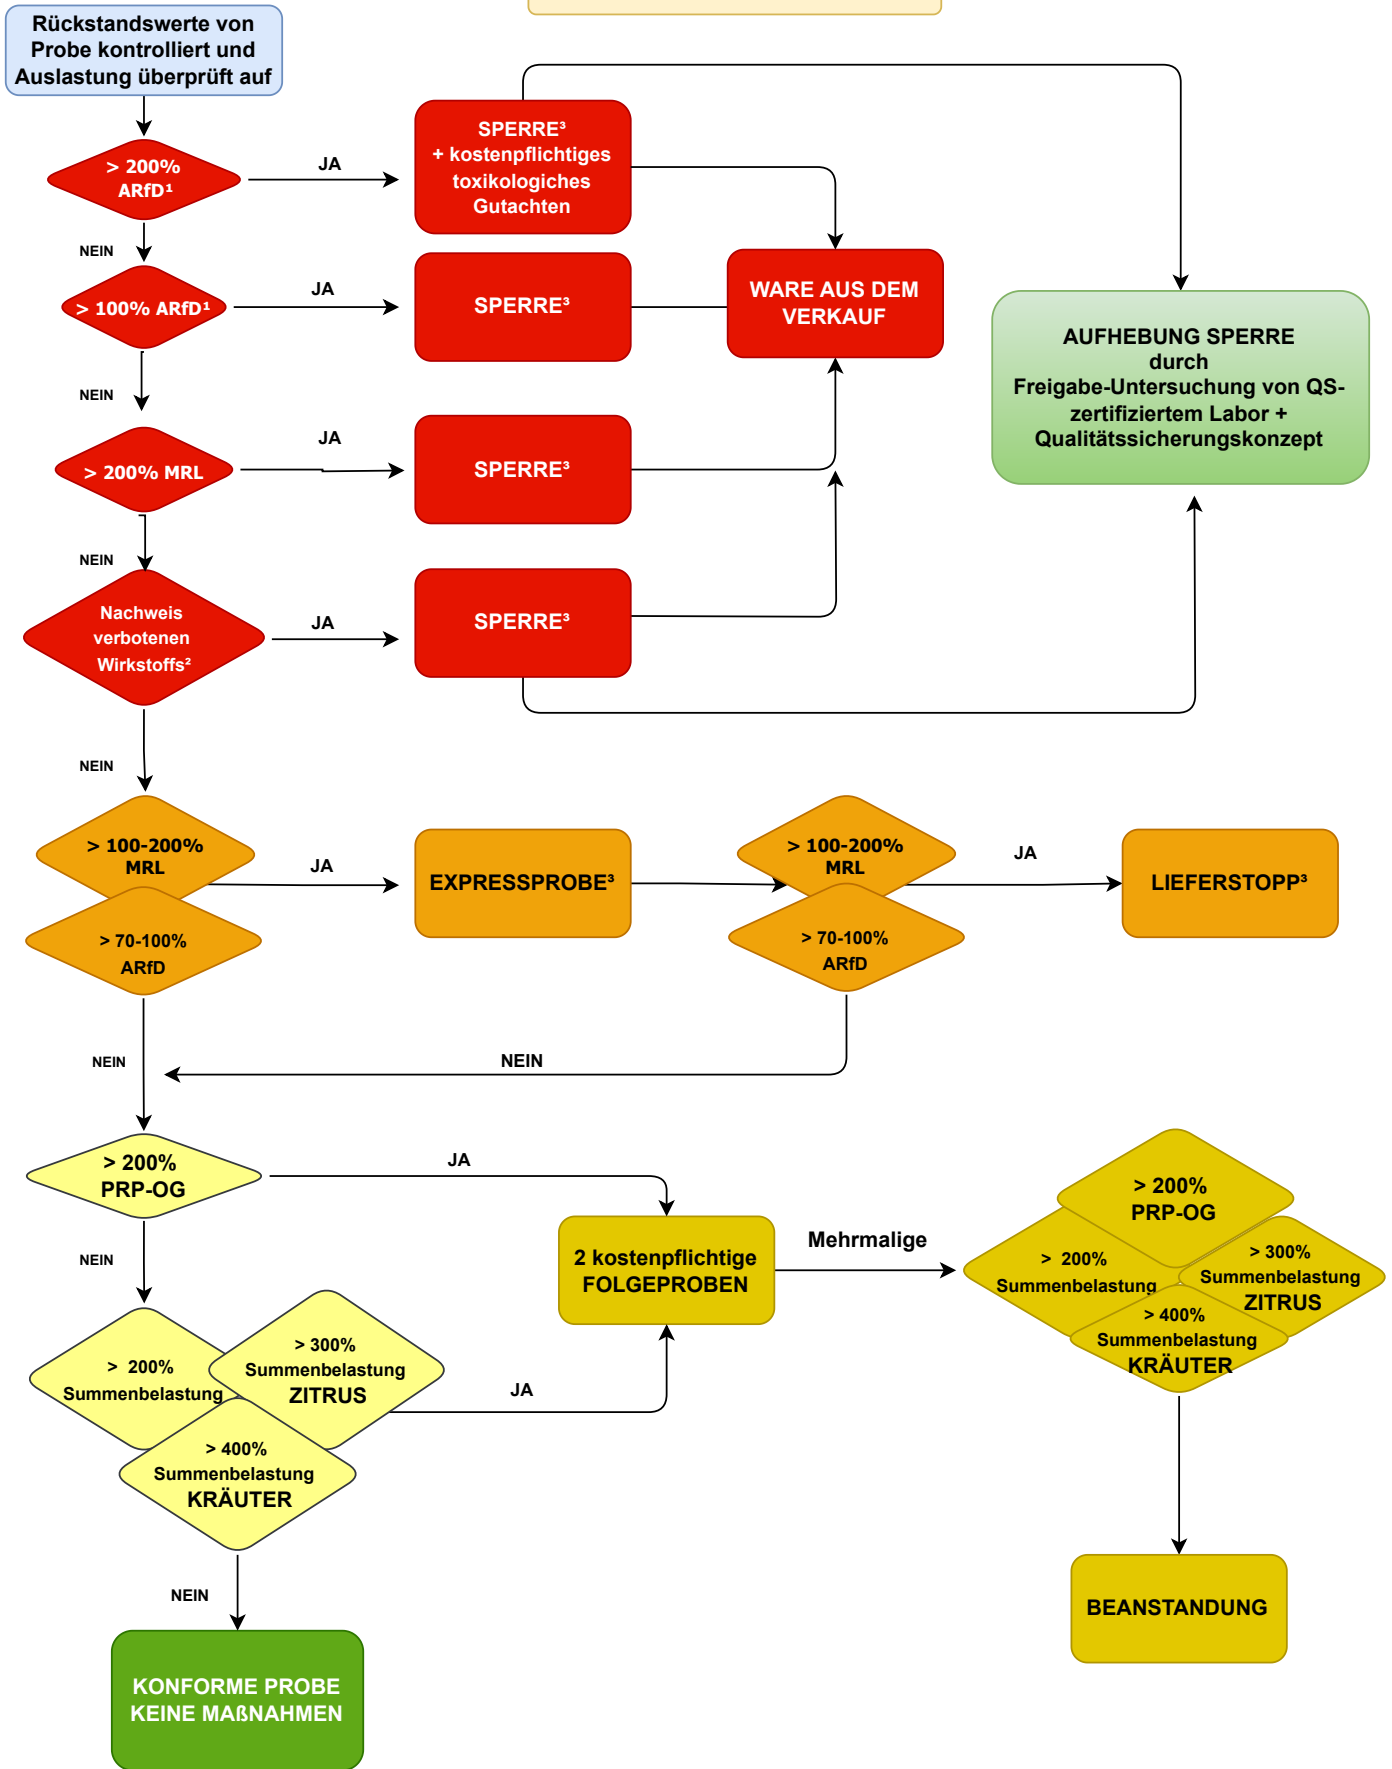

Metaboliten: für Metaboliten wie z.B. THPI und Esfenvalerat (RR, SS, RS & SR) werden die ADI und ARfD der Rückstandsdefinition nach der EU Verordnung angewendet.

Nacherntebehandlungsmittel:

- Imazalil-Zitrus & Imazalil-Kürbisgewächse ungenießbarer Schale (EU Code 0233000)*:

Diese PRP-Obergrenzen sind PRP-interne Werte ausschließlich für die Anwendung in der Nacherntebehandlung mit Imazalil auf Zitrus und Früchten mit nicht essbarer Schalen.

KLASSISCHES PRP PROZEDERE

*Nach dem PRIMo 3.1 Modell (EFSA)

²Nach der Stockholmer Konvention

³angewandt auf der untersten, zum Zeitpunkt der Probenziehung (Etikett) erkennbaren Ebene (verfügbare Einheit: Produzent, Gruppe, Lieferant)

ADI, ARfD Values and PRP-Upper limits (valid from 1st March 2025)

The PRP-UL are rounded to four digits. Error expected.
