

**GLOBAL 2000**

# PESTICIDE REDUCTION PROGRAM

**Upper limits**

**REWE**   
GROUP

March 2025

The list of PRP upper limits is generated by mean of an export file from the EU-Pesticides Database. Thus, the information in this list are based on the data available at a specific time (date of download: 19/12/2024), which are not always the currently valid ones. However, the currently published ADI and ARfD values from the EFSA Assessment Report on the respective active substances always apply. We keep track of updates to the EU Database and regularly update the PRP list with the published changes.

>> <https://ec.europa.eu/food/plant/pesticides/eu-pesticides-database/active-substances>

## I. LEGEND:

-  Substances identified as EDC (Endocrine Disrupting Chemicals). Their PRP-upper limits were halved since 1. October 2016.
-  As Top 25 (Top 10 + 15 New) classified EDC by the PRP (see PRP-Manual).
-  Substances which PRP-Upper limits decreased due to new and/or lower ADI data corresponding to the EU Pesticides Database. Valid from 01.03.2025
-  Substances which PRP-Upper limits increased due to new and higher ADI data corresponding to the EU Pesticides Database (valid immediately).

## II. PROCEDURE:

**ARfD exceeding on products with inedible peel (small and large, under Part A of Annex I of EU Regulation 396/2005:**

In the event of an exceedance of ARfD of a given substance, the edible portion of the fruit shall be analyzed. The ARfD calculation model in use is PRIMo- Pesticide Residue Intake Model 3.1 by EFSA: <https://www.efsa.europa.eu/de/applications/pesticides/tools>

**EU-MRL regulation is always applicable.**

PRP-Upper limits:  $PRP-UL = [13,5\text{kg (4-6 years old child)} \times ADI] / 1\text{kg (fresh fruits or vegetables/day)}$ . It applies a tolerance margin up to 200% to the PRP-UL.

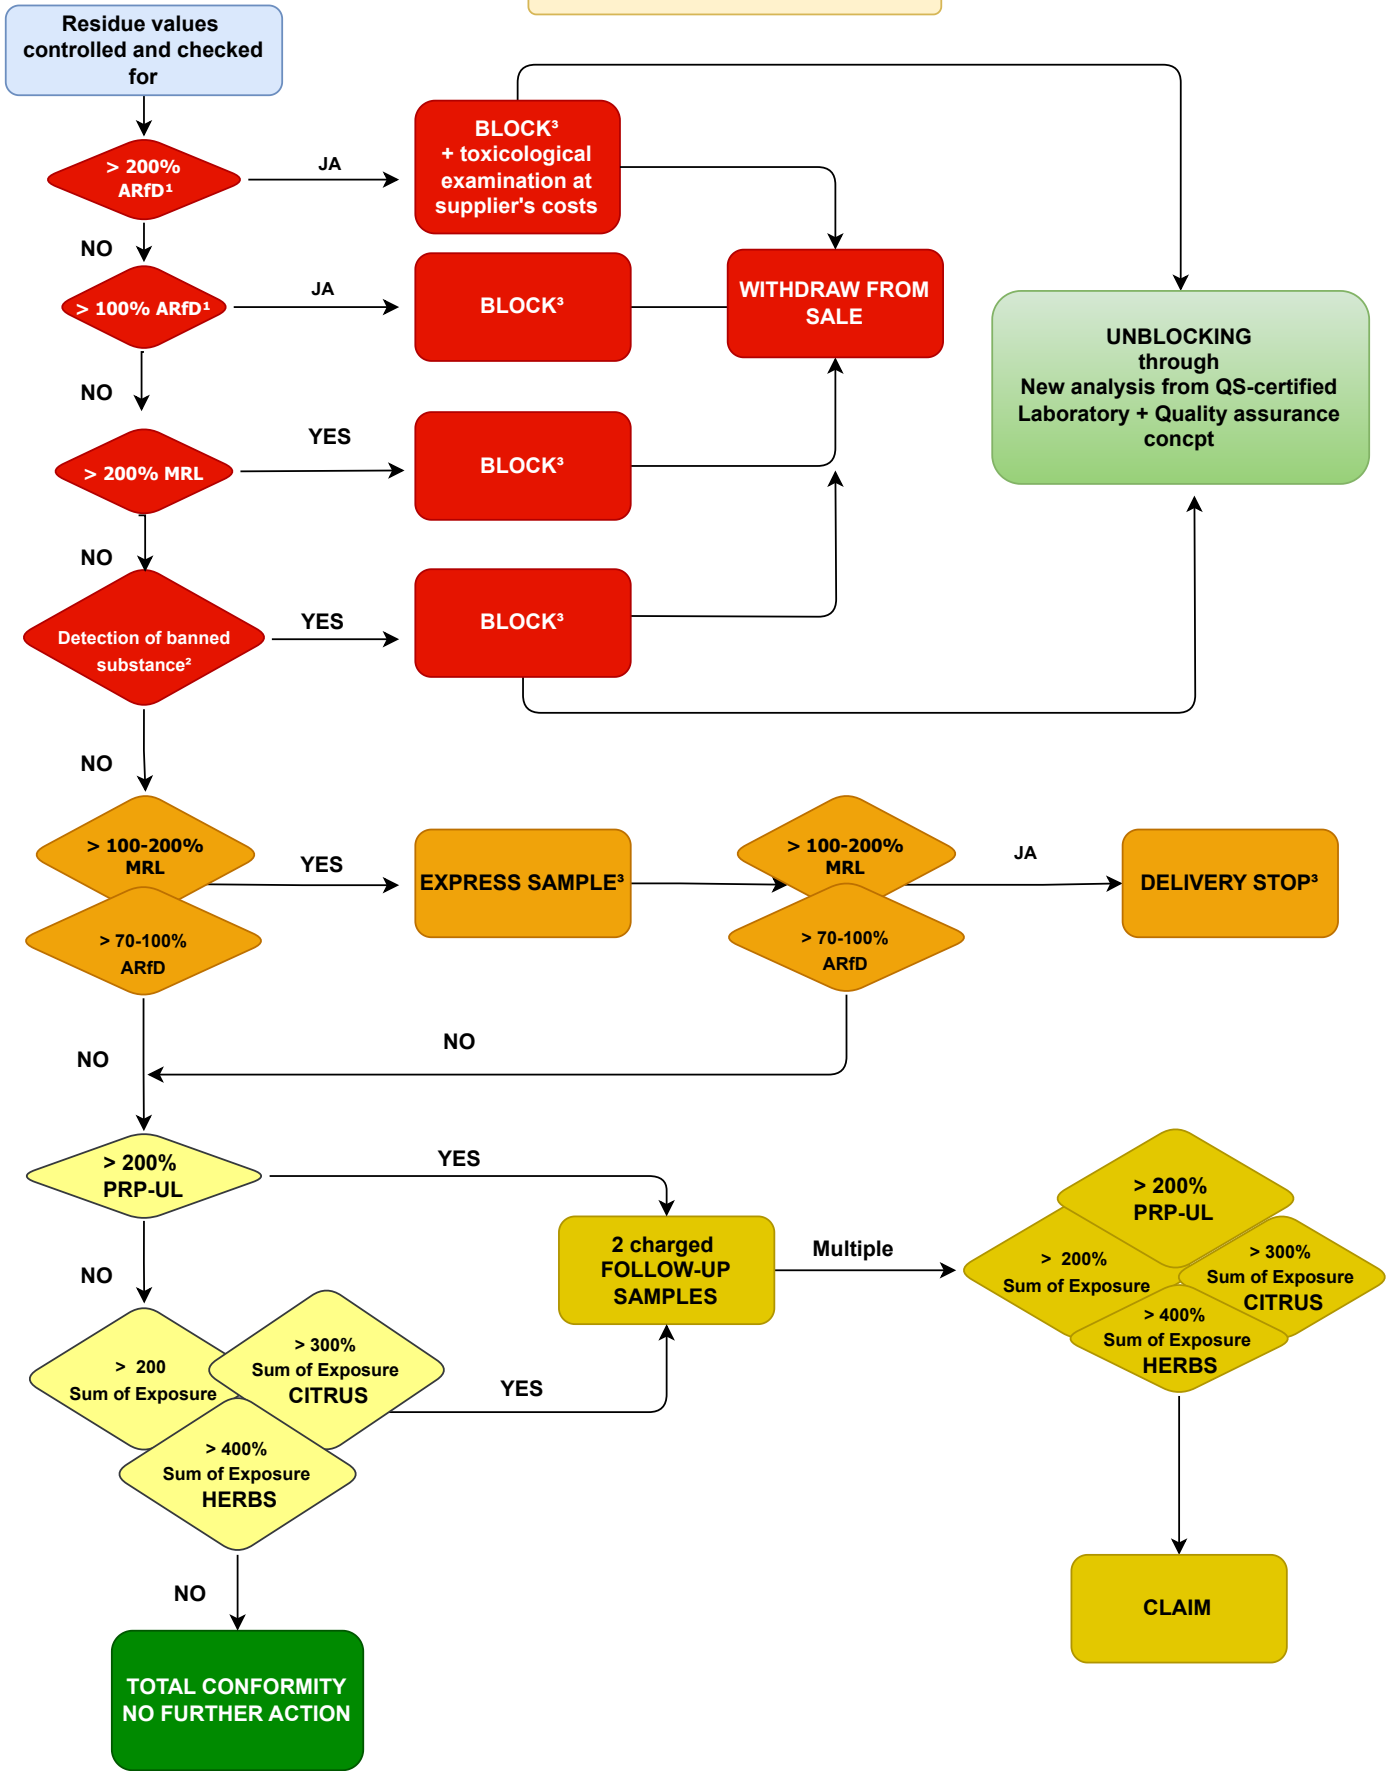

Metabolites: for metabolites such as THPI (Captan) and Esfenvalerate (Fenvalerat RR, SS, RS & SR) the ADI and ARfD of the residue definition are applied.

### Postharvest-Treatments:

- Imazalil-Citrus, Imazalil-Cucurbits with inedible peel (EU Code 0233000)\*:

The PRP upper limits of Imazalil-Citrus & fruits with inedible peel are PRP-intern only for use in post-harvest treatments.

**CLASSIC PRP PROCEDURE**

\*According to PRIMo 3.1 Modell (EFSA)

²According to Stockholm's Convention

³applied at the lowest level recognizable at the time of sampling (label) (available unit: producer, group, supplier)

## ADI, ARfD Values and PRP-Upper limits (valid from 1<sup>st</sup> January 2025; red highlighted from 01.03.2025)

The PRP-UL are rounded to four digits. Error expected.
